Reasons for Allowance

5. The following is an examiner's statement of reasons for allowance:

The claimed inventions pertain to an electronic auction between a prospective buyer and a plurality of sellers.

Alaia et al. (US 6408283) teaches a system for maintaining providing bid information from a plurality of supplier is ranked based on a plurality of criteria. For example, Alaia teaches ranking the top bids in accordance with respective bid amounts, for example, highest to lowest bid prices for auctioned items.

Art Unit: 3693

Carlton-Foss (US Pat. 6647373) discloses a method and system for presenting auction information to the buyer in a reverse auction. The offers or bids from a plurality of sellers are evaluated based on a plurality of rated and ranked based upon a plurality of buyer identified bid evaluation criteria. After closing of the auction the buyer requesting the offers is presented with the winning bids and the rating information in order to determine winning bids.

Alaia and Carlton-Foss deemed as closest prior art fails to teach or suggest a method facilitating an electronic auction which comprises the inventive feature of communication of seller offers and a part of rating information to the buyer when a seller offer having a rating above buyer-specified rating level is received. Alaia teaches communicating the seller price ranking and percentage savings from the individual sellers during the course of the auction. Carlton-Foss teaches that the seller rating information is communicated upon conclusion of the auction. Neither reference teaches that the information is communicated to the buyer when a rating of a seller offers is received, which is above a buyer, specified rating level.
